Nick Osipov

Data Scientist / ML Engineer

Phone : +7 911 953 94 50

Email : nick.osipov.91@gmail.com

Telegram : https://t.me/NickOsipov

GitHub : https://github.com/NickOsipov

Adress : Saint-Petersburg, Russia

EDUCATION

2013 – 2015
Master's Degree: Rocket Science
Omsk State Technical University
OmSTU
Topic: Investigation of the thrust reverse of the power plant of an aircraft in a wind tunnel.

2009 – 2013
Bachelor's Degree: Rocket Science
Omsk State Technical University
OmSTU
Topic: Design of a pneumohydraulic system of a liquid-propellant rocket engine with unitary fuel.

COURSES

Specialization "Machine Learning and Data Analysis" (**Yandex/MIPT)**
Data Analysis in Python (**CS Center)**
mlcourse.ai (**Open Data Science)**
dlcourse.ai (**Open Data Science)**
Deep Learning School (**MIPT)**
Neural Networks & CV (**Samsung**)

SKILLS

PYTHON

SQL

R

EXPERIENCE

March 2022 – Present
Support Engineer ML
Karpov.Courses, Moscow, Russia
Work as a support engineer on the course for education Machine Learning Engineers - Start ML.
Students solving problems with educational process. Code-review. Testing courses tools. Work with courses content.
Stack: Python, Pandas, NumPy, Seaborn, Maplotlib, Scikit-Learn, LightGBM/XGBoost/CatBoost, PyTorch, Fast API, PostgreSQL, Airflow, Git.

December 2020 – December 2021
Data Scientist
ChemTech AI, New-York, USA
Work as a data scientist on the following tasks:
Multiply time series: prediction, forecasting, anomaly detection, mining.
Computer vision: text recognition, object detection.
Stack: Python, Pandas, NumPy, Plotly, Seaborn, Scikit-Learn, LightGBM/XGBoost, Statmodels, Optuna, MLFlow, Keras(TensorFlow), PyTorch, OpenCV, Flask, PostgreSQL, Git, Excel.

October 2016 – December 2020
Senior Video Engineer / VJ
AV-Technology, Saint-Petersburg, Russia
Work as a video engineer, tech lead at the site, VJ for events.
Stack: Resolume, TouchDesigner, Python, vMix

STACK

Programming:
Python: stdlib, PyCharm, Jupyter Notebook/Lab, VS Code
R: Rstudio
Data Analysis: NumPy, Pandas, SciPy, Statmodels
Visualization: Plotly, Dash, Seaborn, Matplotlib
Machine Learning: SciKit-Learn, XGBoost/LightGBM/CatBoost, Prophet
Deep Learning: Keras (TensorFlow), PyTorch
Business Intelligence: Tableau, PowerBI, Excel
Database: PostgreSQL, ClickHouse, Oracle
Production: Fast API, Flask, Git, Docker
Math: MathCAD, Maple
