Nick Osipov

Data Scientist

TN : +7 911 953 94 50

Email : nick.osipov.91@gmail.com

VK : https://vk.com/nickolayosipov

GitHub : https://github.com/NickOsipov

Adress : Saint-Petersburg, Russia

EDUCATION

2013 – 2015
Master's Degree: Rocket Science
Omsk State Technical University
OmSTU
Topic: Investigation of the thrust reverse of the power plant of an aircraft in a wind tunnel.

2009 – 2013
Bachelor's Degree: Rocket Science
Omsk State Technical University
OmSTU
Topic: Design of a pneumohydraulic system of a liquid-propellant rocket engine with unitary fuel.

COURSES

Specialization "Machine Learning and Data Analysis" (**Yandex/MIPT)**
Data Analysis in Python (**CS Center)**
mlcourse.ai (**Open Data Science)**
dlcourse.ai (**Open Data Science)**
Deep Learning School (**MIPT)**
Neural Networks & CV (**Samsung**)

SKILLS

PYTHON

SQL

R

EXPERIENCE

June 2021 – September 2021
Data Scientist
ChemTech AI, New-York, USA
Work as a data scientist on the following tasks:
Multiply time series: prediction, forecasting, anomaly detection, mining.
Computer vision: text recognition, object detection.
Stack: Python, Pandas, NumPy, Plotly, Seaborn, Scikit-Learn, LightGBM/XGBoost, Statmodels, Optuna, MLFlow, Keras(TensorFlow), PyTorch, OpenCV, Flask, PostgreSQL, Git, Excel.

November 2016 – July 2020
Senior Video Engineer/Technical Lead
AV-Technology, Saint-Petersburg, Russia
Work as a video engineer, technical lead at the site, VJ for events (SPIEF, Cultural Forum, FIFA World Cup etc.)

PROJECTS

Neural network with LSTM-layers (variational autoencoder) for generating time series and anomaly detecting. Designed optimal architecture and validation score.
https://github.com/NickOsipov/projects/tree/main/lstmvae_time_series_anomaly_detection
Another completed projects can be viewed on my GitHub, in this repository:
https://github.com/NickOsipov/projects

STACK

Programming:
Python: stdlib, PyCharm, Jupyter Notebook/Lab, VS Code
R: Rstudio
Data Analysis: NumPy, Pandas, SciPy, Statmodels
Visualization: Plotly, Dash, Seaborn, Matplotlib
Machine Learning: SciKit-Learn, XGBoost/LightGBM/CatBoost, Prophet
Deep Learning: Keras (TensorFlow), PyTorch
Business Intelligence: Tableau, PowerBI, Excel
Database: PostgreSQL, ClickHouse
Production: Git, Docker
Math: MathCAD, Maple
