

Nick Osipov

MLOps Engineer

Brazil, Florianopolis | +995 598 59 53 74

in/nickosipov | tg: @NickOsipov | nick.osipov.91@gmail.com

EXPERIENCE

Kadam <i>Senior MLOps Engineer</i> Department: DevOps	Limassol, Cyprus <i>May 2023 - Present</i> Remote
- Developed alerting system. Developed custom framework for deploying k8s/terraform. - Integrated: Agents, A/B-testing, Prefect, Airflow, CI/CD (GitLab, AWS), Docker, tests, linters.	
Karpov.Courses <i>Head of Experts, Teacher</i> Courses: ML Engineer, DL Engineer, Hard ML, Data Engineer	Moscow, Russia <i>April 2022 - Present</i> Remote
44 streams of students graduated. Lead a team of 8 ML experts. Trained 10 interns. - Designed MLOps and Dynamic Pricing modules at HardML course.	
Siberian Wellness <i>Data Scientist</i> Department: Data Analysis	Novosibirsk, Russia <i>January 2022 - December 2022</i> Remote
- Design analytical reports with anomaly detection. Improve Data-Driven Decision Making. - Developed numerous ETL/ML pipelines for dashboards and auto-reports.	
ChemTech AI <i>Data Scientist</i> Team: Data Science	New-York, USA <i>October 2020 - December 2021</i> Remote
- Refactoring 3 legacy prediction projects from TensorFlow to LGBM/CatBoost. - Developed computer-vision systems for object detection and OCR.	

EDUCATION

OMSTU <i>Bachelor and Master Degrees of Rocket Science</i>	Omsk, Russia <i>2015</i>
--	-----------------------------

SKILLS

Programming: Python, R, Bash, SQL, PHP
Instruments: VS Code, PyCharm, Jupyter Notebook/Lab, DataGrip, dbeaver, RStudio
MLOps: MLflow, ClearML, Prefect, Airflow, Argo Workflows, DVC, WandB
LLMOps: vLLM, Ollama, Triton, LangChain, LangGraph, LangFuse, HuggingFace
Infrastructure: Linux, Git, Docker, Terraform, Ansible, Kubernetes, Helm
CI/CD: GitLab CI/CD, Github Actions, Jenkins, BitBucket Pipelines
Cloud: Yandex Cloud, AWS
Monitoring: Grafana, Prometheus, Sentry, Evidently AI
Database: ClickHouse, MySQL, Oracle, PostgreSQL
NoSQL/Object Storage: S3, MinIO, Ceph, Aerospike, Redis, MongoDB
Big Data: Hadoop, Spark, Hive
Data Analysis: Numpy, Pandas, Polars, pySpark, SciPy, Statmodels
Visualization: Plotly, Seaborn, Matplotlib, Bokeh, Tableau
Machine Learning: Scikit-Learn, XGBoost/LightGBM/CatBoost, Prophet
Deep Learning: PyTorch, Keras, TensorFlow
Backend: FastAPI, Flask, Streamlit, Gradio, Dash
